Which lube with which toy

Water-based lube is safe with every toy and every condom, which is why it's the one to start with. The others depend on the toy.

	WATER-BASED	SILICONE-BASED	HYBRID	OIL-BASED
Silicone toys	Yes	Ask the toy's maker. 13 of the 17 toy makers we checked say no	Test it first, or ask the maker. It contains silicone	Safe for the silicone, but hard to wash out of texture
Stroker sleeves (TPE, SuperSkin)	Yes	No. Fleshlight says water-based only	No	No
Glass and stainless steel	Yes	Yes	Yes	Yes
Hard plastic (ABS)	Yes	Yes	Yes	Ask the maker
Latex and polyisoprene condoms	Yes	Yes	Yes	No. Oil breaks down latex

If a toy's maker gives a rule about lube, follow it. A reaction shows up as a tacky or swollen surface.

Patch-test any new lube on your skin first, whatever it's made of.

What each toy maker and lube maker says about silicone lube on silicone toys, in their own words: thetoyslut.com/guides/silicone-lube-silicone-toys
